

Title	Scanning & Viewing DTCs for Anti-Lock Braking Systems (ABS)						
Tool #	5110	Creator	David G.	Created/Update Date	8/30/2023	T/N #	23-5110-007
Description: To guide the user on how to scan and view ABS DTCs with the Innova 5110.							

1. Connect to DLC: Attach the Innova 5110 to the vehicle's Data Link Connector (DLC), and then turn the ignition to the ON position.

2. Auto-Linking: Wait for the tool to automatically establish a link with the vehicle's computer. If this is already done, skip to step 3.

3. Scan ABS Codes: Press the ABS button on the tool. After a short delay (about 4-5 seconds), any ABS-related DTCs will be displayed. If the vehicle doesn't support ABS diagnostics, the tool will show 'N/A'.

4. View Additional Codes: If multiple codes are present, you can cycle through them by pressing and releasing the ABS button.

5. Priority Code: After viewing all the DTCs, pressing the ABS button again will bring you back to the 'Priority code', which is typically the most critical issue that needs to be addressed.
